

Agui Town Flood / Landslide Disaster / Tsunami Hazard Map 阿久比町 洪水、土石流災害、海嘯災害地図

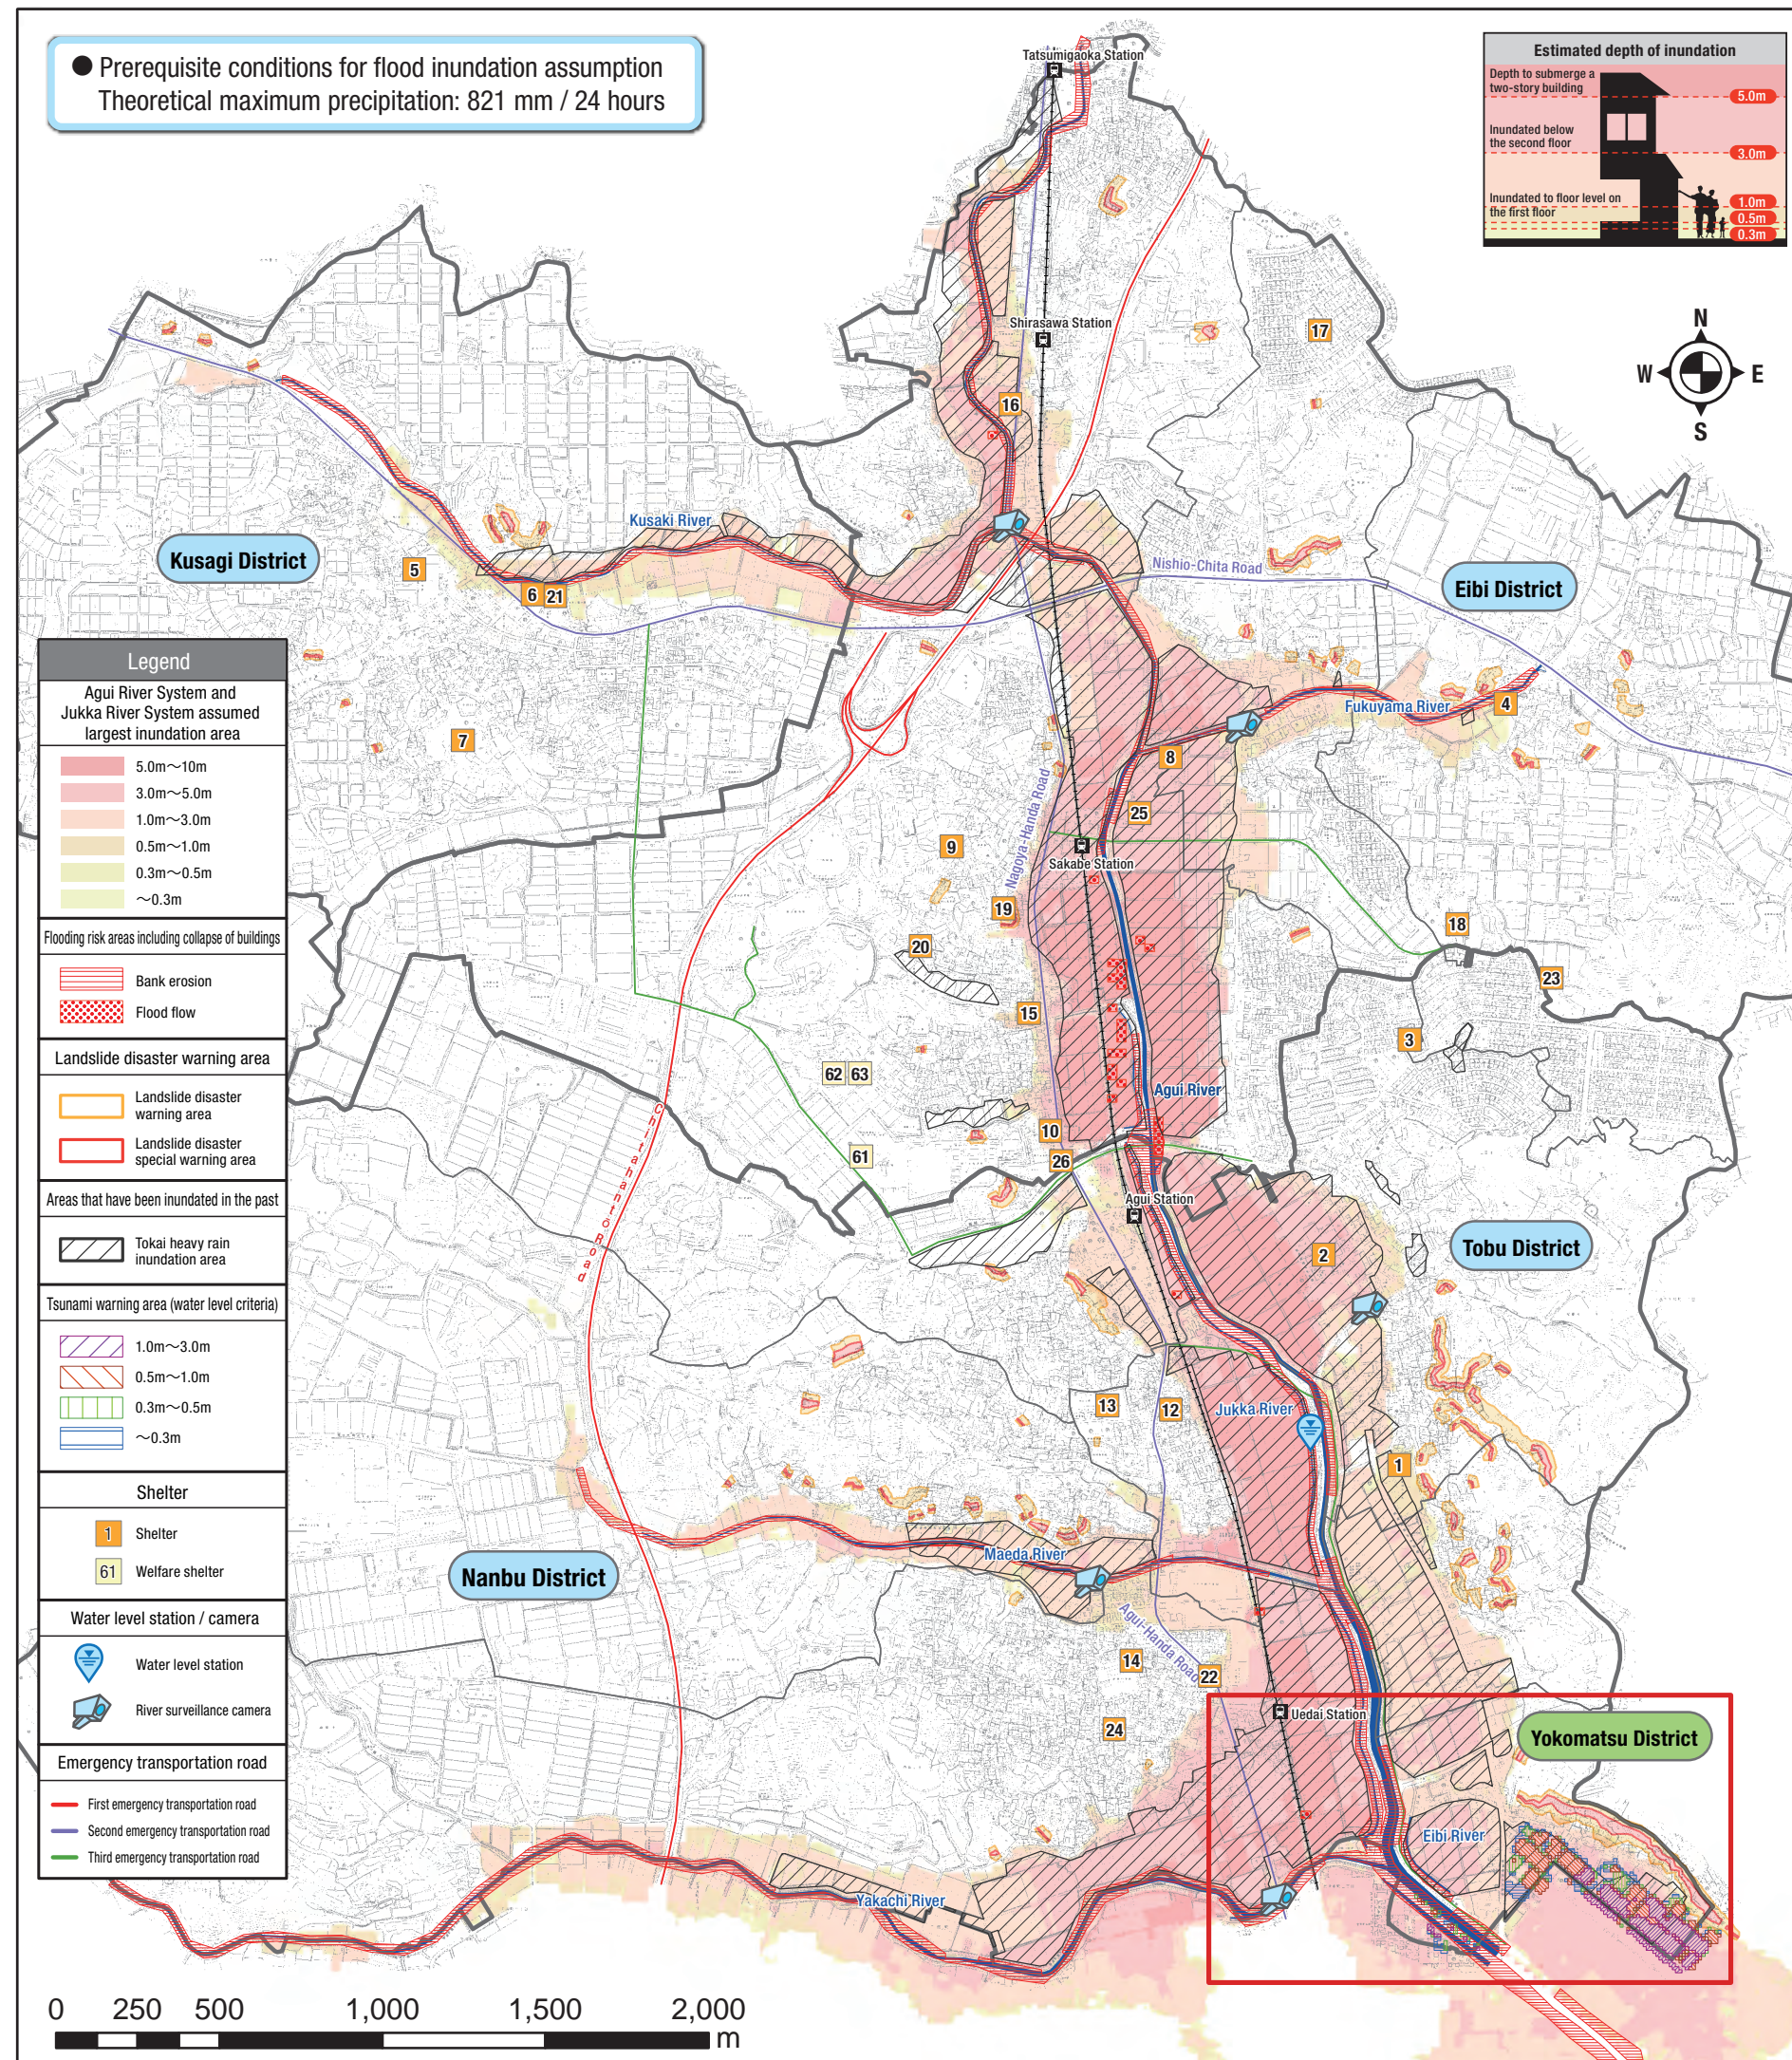

아구이초 홍수·토사 재해·쓰나미 재해예측도 Inundação da Cidade de Agui/Desastre de Deslizamento de Terra/Mapa de Risco de Tsunami

Agui River System and Jukka River System Expected Inundation Area Map, Landslide Disaster Warning Area Map

阿久比川河系、十川河系淹水予測图、土石流災害警戒区域地図

아구이가와강 수계·쫇카가와강 수계 침수 예상도·토사 재해 경계 구역도

Mapa da Área de Inundação Esperada do Sistema do Rio Agui e do Sistema do Rio Jukka, Mapa da Área de Alerta de Desastre de Deslizamento de Terra

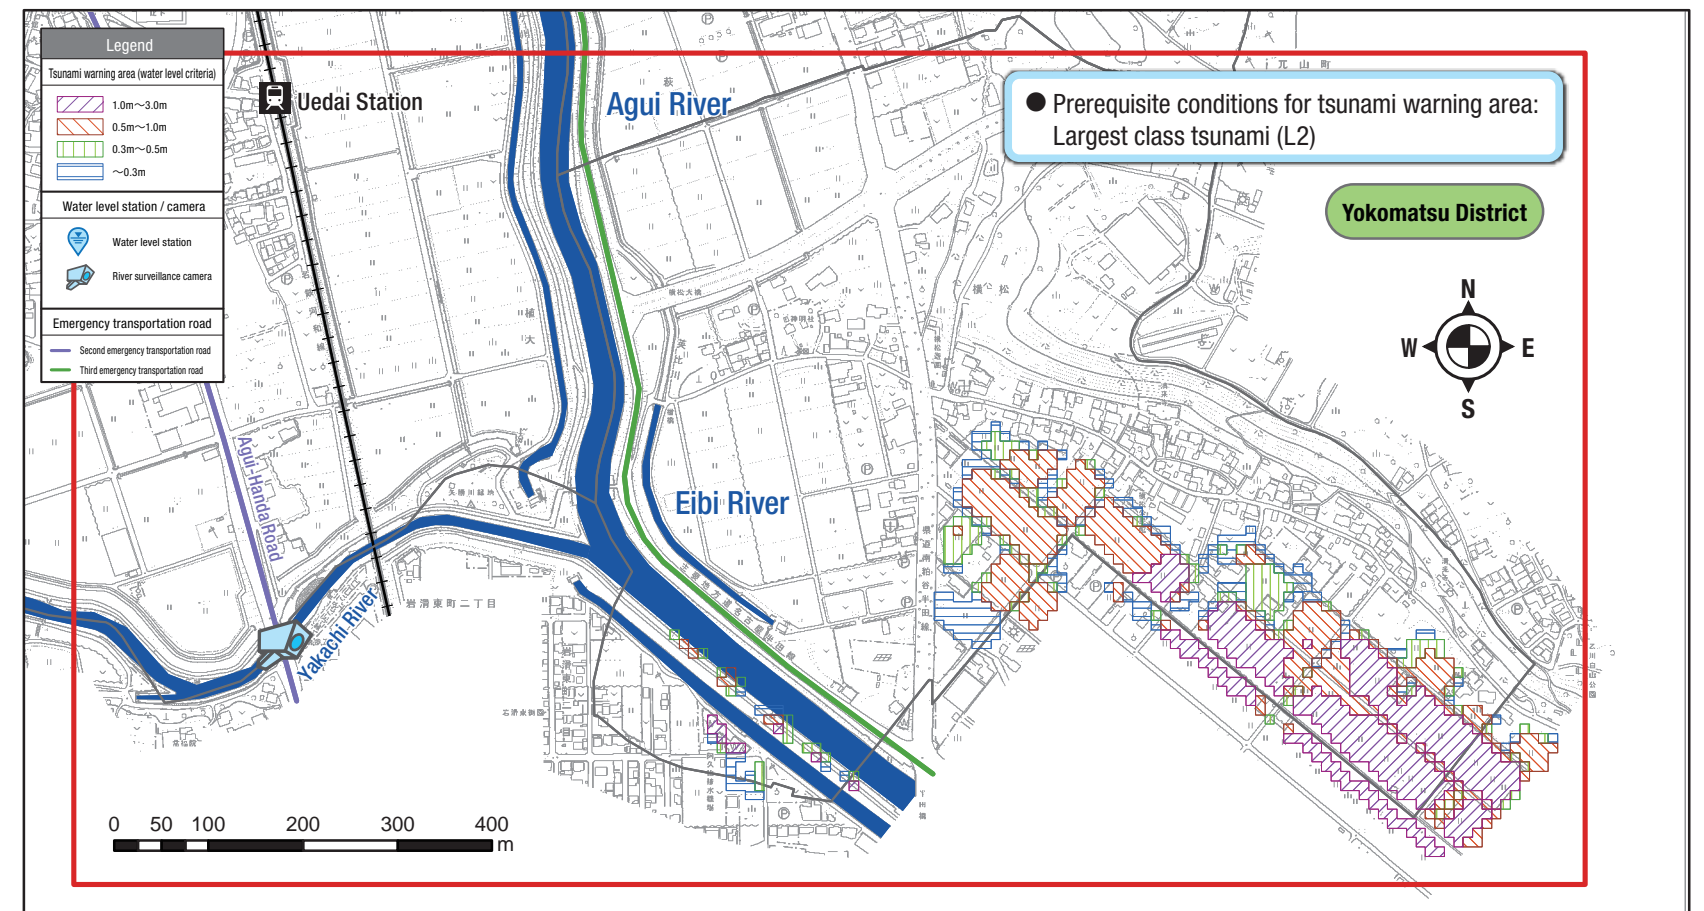

Tsunami Disaster Warning Area Map

海嘯災害警戒区域图

쓰나미 재해 경계 구역도

Mapa da Área de Alerta de Desastre de Tsunami

This map was prepared based on the “Agui River System and Jukka River System Expected Inundation Area Map” published by Aichi Prefecture in April 2020 and “Book Related to Public Notice of Designation of Tsunami Disaster Warning Area”. The expected inundation range and depth in the town when heavy rains fall in the Agui and Jukka River basins, areas where rivers may overflow and houses may be flooded (flooding risk areas including collapse of buildings), and areas at risk of landslide disasters (landslide disaster warning areas) are shown on the map. **Please note that depending on how it rains and the magnitude of the earthquake, inundation may occur even in places not shown on this map, and the inundation depth may increase.**

此地图根据爱知县在 2020 年 4 月公布的“阿久比川水系、十川水系淹水予測图”和“海嘯災害警戒区域の指定公告相关图书”为基础制作。此地图显示了阿久比川、十川流域发生大雨或海啸时街道内预想的淹水范围和深度、河流泛滥时有房屋被冲毁危险的区域（房屋倒塌等泛滥假设区域）、有土石流灾害危险性的区域（土石流灾害警戒区域）。**请注意：根据降雨的范围和地震的规模，即使在图中未标出的地方也有淹水可能性，且淹水深度也有变深的可能性。**

이 지도는 아이치현이 2020년 4월에 공표한 ‘아구이가와강 수계·쫇카가와강 수계 침수 예상도’와 ‘쓰나미 재해 경계 구역의 지정 공시’에 관한 도서를 바탕으로 작성한 지도입니다. 아구이가와강·쫇카가와강 유역에 호우가 내린 경우나 쓰나미가 발생한 경우, 마을 내에서 예상되는 침수의 범위와 깊이, 하천이 범람하여 가옥이 떠내려갈 우려가 있는 구역(가옥 도괴 등 범람 예상 구역), 토사 재해의 위험성이 있는 구역(토사 재해 경계 구역)이 지도 상에 표시되어 있습니다. **강우 상태나 지진 규모에 따라 이 지도에 표시되지 않은 장소에서도 침수가 발생할 가능성이 있으며, 침수 깊이도 깊어질 수 있으므로 주의하시기 바랍니다.**

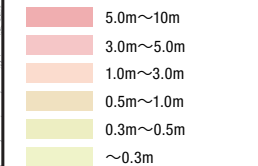

Este mapa foi elaborado com base no “Sistema do Rio Agui e Mapa da Área de Inundação Esperada do Sistema do Rio Jukka” publicado pela Prefeitura de Aichi em abril de 2020 e “Livro Relacionado ao Aviso Público de Designação de Área de Alerta de Desastre de Tsunami”. A esperada faixa de inundação e profundidade na cidade quando chuvas forte caem nas bacias dos rios Agui e Jukka, áreas onde rios podem transbordar e casas podem ser inundadas (áreas de risco de inundação, incluindo o colapso de edifícios), e áreas em risco de desastres de deslizamento de terra (áreas de alerta de desastre de deslizamento de terra) são mostradas no mapa. **Observe que, dependendo de como chove e da magnitude do terremoto, a inundação pode ocorrer mesmo em lugares não mostrados neste mapa, e a profundidade da inundação pode aumentar.**
